

To Whom It May Concern:

30th October 2013

Karine Szekeres completed her three months internship at Tetsuo Kondo Architects under my supervision and I am glad to write a letter recommending her for a position in the architectural field.

During her internship, Ms. Szekeres was exposed to a wide range of projects. Her main tasks included designing urban furnitures for the city of Towada in Japan, working on the competition project "Warming Huts" in Winnipeg, Canada and preparatory activities for the JA magazine.

Ms. Szekeres adapted quickly to the work setting in my office. She is very diligent, hard working and she was always dedicated and determined to accomplish the given tasks. Her architectural communication skills are outstanding. Ms. Szekeres provided us enriching ideas and her approach towards architectural design is well founded. In addition, she is very interented in Japanese culture, especially in architecture. She visited many places to see various architectures to gain further knowledge and understanding in Japanese architecture. I was impressed by her vitality and enthusiasm, thus I was very pleased to have had Ms. Szekeres as an intern at my office.

What is more, Ms. Szekeres is a personable and open-minded individual. I would expect her to perform well in a wide range of creative environments. She is a focused and determined person and I feel very confident that she will be successful in all her future endeavors.

Best Regards,

Tetsuo Kondo
